## CORPORATION

M Jean-Michel Vallentin in order to reply to the increasing needs of his clients to subcontract the all logistic chain ; he proposes a new logistic management. Initially as a carrier, M Vallentin knew how to develop his previous job and became a logistic supplier (Stocking, conditioning, transport, distribution).

Today, his son has taken up the company activity and wants to keep the same family-size in order to protect **STOCK PLUS** first objective: satisfying each of his clients with a good quality service replying to their real needs.

## STOCK PLUS Numbers

- **More than 1 million dollars annual sales**
- **70 000 pallets delivered**
- **8 million dollars goods warehoused**

## Flexibility

As there are no two identical enterprises, **STOCK PLUS** creates, organises, introduces and pilots the operations within the framework of a global logistic chain. The operations meet our customers' expectations, their specific products and marketing aims.

Logistic activity is a real job and **STOCK PLUS** will provide you a **good quality service** based on the experience of a confirmed specialist.

Today we are specialised in the food conditioning, in the stocking and distribution of air-fittings (air-

**Innovative and customised logistic solutions, according to every individual customers needs.**

**Beyond the simple storage activity, we manage your stock transparently, prepare yours orders, package your parcels and organize consignments.**

## Reactivity

- management of batch number and references (bar code technology),
- Data interchange capabilities for orders, inventory status, receipts and various reports (instock, outstock, statistics...)
- management of alert and security stocks, triggering of supply,
- complete history of flow,
- delivery receipt issuing,
- theoretic and real periodical inventories.
- informatic adapted to your needs

**Protection and safety of staff and  
environment**

## Reliability

We store all types of merchandises, on mass or palettes, thanks to **modern and adapted equipment** (dock levelers, material handling devices).

The buildings are insulated, heated, guarded, and equipped with security alarms, fire hoses, automatic sprinkler system (fire protection) and fire alarms. Anyway, the stocked material is insured against theft and fire.

We take **special care of our environment**. That is why pays particular attention to waste management. We select empties and recycle waste materials. **STOCK PLUS** chose an integrated engineering of building and maintenance, ensuring consideration of the possible environmental hazards in view of long-term development.

## OUR VALUE

*Man in heart of the  
organisation*

*People professionalism and human quality insure the success to the company. Men and women of STOCK PLUS at each level works in transparency with a high sens of responsibility.*

*Client satisfaction*

*Clients' satisfaction research is a real partnership winner/winner. Clients' satisfaction is the results of different factors: technical quality of the service, human relation, and availability, capacity to understand the needs and to propose efficient solutions respecting the timing.*

*The Now-How,  
technical knowledge*

*It is a real company spirit, common to everyone. To know how to react at each steps of the operating system and also to know how to adapt ourselves to a changing market and to take advantage of each opportunity coming up.*

## Establishment

**Poitou-Charentes region :  
environnement is a priority**
